

# CREATE AND CONFIGURE IBM CLOUD SERVICES

## IOT BASED SAFETY GADGETS FOR CHILD SAFETY MONITORING AND NOTIFICATIONS

### NODE RED CREATION

The screenshot displays the IBM Cloud console interface for a resource named "Node RED ALWOI 2022-10-30". The top navigation bar includes the IBM Cloud logo, a search bar, and links to Catalog, Manage, and the user's account (Kiruthika D's Account). The main content area is divided into several sections:

- Details:** A table-like section showing app information. It includes fields for App URL, Source (with a "Download code" button), Resource group (set to "Default"), Deployment target, and Created date (10/30/2022).
- Deployment Automation:** A section titled "Configure Continuous Delivery" explaining that Continuous Delivery is not enabled for this app and providing instructions on how to enable it through Delivery Pipeline, GitLab, and more. It includes a "Deploy your app" button.
- Services:** A section showing the "Cloudant" service and a link to "Provisioning service credentials". It features two buttons: "Connect existing services" and "Create service".

On the right side of the console, there is a vertical sidebar with the text "ASK A QUESTION" and a blue button with a question mark icon.
